## Information for guests with a medical condition

**For our guests with a medical condition, we require the following:**

1. A **veterinarian's note** stating:
  - your cat's medical condition
  - that your cat's medical condition is non-contagious
  - that your cat is healthy enough to board
2. A **completed medication form** that you will fill out that outlines all medications your cat(s) receive (one form for each cat receiving medications).

**Please make sure we have both of these documents  
at least 3-5 days in advance of your cats stay with us.**

3. If your kitty is taking medication, please know we only administer medication as prescribed by a veterinarian and as indicated on the medication's original container.
4. Please bring the medication in its original container with the current and correct instructions. If the dosage has changed from what is printed on the container, please have your veterinarian mail or email us the most current instructions.
5. If the medication is in pill form, please make sure they are in the quantity needed (i.e., if we need to administer "one-half" tablet, please bring the pills already cut into "one-half" tablets).
6. Please include additional medication in case your trip is unexpectedly extended.

If you have any questions, please ask!

I accept this policy.
